Wonderwalls.01

Fitted with a wealth of play functions in a reduced space Wonderwalls are specifically aimed at the needs of toddlers and pre-school children. Each equipment design offers a number of play worlds that are interconnected by windows and passages between the three or respectively four walls, which are fanned out around a central post.

As well as space for retreat, children are encouraged to engage in role-playing games using elements such as mud tables, benches, sand workshops or openings in the walls. Language and social skills are fostered and trained in a playful way.

The highlight of Wonderwalls.01 in the design of a tree stump is a passage with rubber membranes connecting two play areas. And anyone looking closely will find a secret opening under the bench.

Technical Data

The following text can also be used for tenders.

Included Products:

- Rubber Membrane Curtain
- Puzzle Elements
- Mud Tables
- Rotating Disc

Tubes:

The Steel tubes with a diameter of Ø 2 3/8" and a wall thickness of 1/8" are thermally galvanized to protect against corrosion and powder-coated in color using a solvent-free epoxy/polyester/process. They are also watertight closed with rounded aluminum caps.

Panels:

Wall, play and design elements are made of solid-colored and grained HDPE panels with a thickness of 3/4" and form milled. All edges are rounded off and the walls are connected to the pipes with cast aluminum panel clamps.

Rubber Membrane:

The rubber mat strips are made of durable and vandal-proof conveyor belt.
